Proud partner of:

Grow a greener life.

Taking care of the planet and each other is in our roots.

We reshore much of our production and adopt a technique that cuts our energy consumption by 80%. We make our offices and ways of working sustainable and efficient.

Our 100% recyclable planters are designed to protect the plants they hold and are produced durably to grow with you.

With our special rain barrel and biodiversity collection we inform our customers about the need to help nature and enable them to contribute to it.

And this is just the beginning!

'Grow a greener life' is more than words in a corporate mission statement. It is how we start cleaning up after ourselves by introducing a collection made from 100% waste including fishing nets. It is how our operations and products in the Netherlands got certified as CO2 Neutral. It is how we offset the emissions that remain and strive to reduce those emissions even further in the future.

It is how we hope to empower our customers to embrace a greener lifestyle. But most of all, it is how we want to inspire you to do the same. So we can work towards a sustainable future for ourselves, but mostly for next generations. Because when all is said and done, that is the only way we can keep our promise to you. Will you join us?

Capi Europe. Grow a greener life.

CO2 Neutral Product

The Made in Holland collection is awarded the CO2 Neutral Product label. This can only be obtained as a result of serious environmental efforts.

PEFC certification

The planters in the Made in Holland collection contain wood fibres to give it a stone-look structure. This wood is PEFC certified.

Lifetime Warranty

We keep growing to become greener & more sustainable everyday. That's why our planters do have a sustainable design that lasts a lifetime!

Made in Holland

The production takes place in our own factory in Holland. You can recognize these planters by their unique orange interior to represent their Dutch origin.

Scan this QR Code to check our **brand movie**.

THE STORY BEHIND OUR POTS.

Part of our production takes place in our own factory in Tilburg, the Netherlands. You can recognise these planters by their unique orange interior. This was intended to represent their place of origin and nowadays it is a recognisable feature of our brand. It is not just a remarkable collection, but also one with a great, sustainable story.

Unique insulating layer

The Made in Holland planters consist of two layers. The outside layer shows the design of our planters. The PEFC certified wood fibres in the raw material give the planters a natural stone look which fits perfectly on our design planters. The second layer on the inside is a unique insulating layer. This bright orange layer shows the Dutch roots of the planter, but most importantly, it takes care of the plants. The layer protects the roots of the plants against frost in winter and heat in summer. By adding the second layer our planters become extra strong, which makes them fracture-resistant. The second layer does not have a negative side effect on their weight: they are still extremely lightweight!

Reshoring

Back to the roots. Part of the production takes place in our own factory in Tilburg. In 2013, the first test models were made over here. The word 'reshoring' was not known back then, but right now it is a permanent part of our story. Reshoring, bringing back production to the Netherlands, was

a big change in the history of Capi Europe. Sustainable flower pots with an orange insulating layer are the outcome of this process.

Production Process

Made in Holland flower pots are made from a powder mixture of polyethylene including recycled materials and wood fibres. These raw materials are poured into the mould using a filling system. This is heated to melt and liquefy the mixture. The robots spin around so that the mixture is distributed throughout the mould. The substance is then cooled to produce the flower pot. The two layers of the pot (outer layer and insulating layer) are made in one single cycle. Once the flower pots are removed from the machines, they proceed to the quality control via a conveyor belt. This inspection is carried out by our product specialists. Afterwards, each pot is provided a Capi label and a barcode. This final process is run by former employees of the Diamant Group, a company for people who have a distance to the labour market.

Result

We have paid extra attention to the design of our Made in Holland series. Although these planters can be used outdoors regardless of the wind and weather, we have noticed that more and more customers are using them indoors as a design object. That is why our Made in Holland planters are designed for indoor and outdoor use.

Each of our planters has a high level of finishing and lots of great features. All Made in Holland planters are resistant to frost and UV light. They are also fracture-resistant and extremely lightweight, which makes them both convenient and easy to use. All of the pots manufactured in the Netherlands are made with recycled materials. Furthermore, they are all CO2 neutral, and are 100% recyclable. Therefore they are very sustainable. Due to these features, we can guarantee sustainable design planters of high quality with a long lifespan and we therefore provide a lifetime warranty on this collection.

Grow a greener life

We will follow our mission 'Grow a greener life' in everything we do and make. That is how we stand for growth and progress. We will help our customers and consumers to embrace a green lifestyle with a sustainable twist. Together we can work towards a sustainable future for ourselves, but also for next generations.

Grow a **greener life.**

Made in Holland Production.

Capi Europe has developed its own rotation moulding method for the production of Made in Holland pots. We are unique throughout the world in using this particular rotation moulding technique. With this process we save up to 80% of the energy compared to traditional rotation moulding.

01 Raw material

Mixture of polyethylene made with recycled material and wood fibres.

02 Big bags

The raw material hangs in big bags. Each big bag contains its own colour.

03 Filling system

The raw materials are automatically poured into the mould, using a filling system.

04 Own rotation moulding process

The mould is heated in order to melt and liquefy the powder. The machines spin around so the mixture is distributed throughout the mould. The substance is then cooled to produce the flower pot.

05 Orange inside

The two layers of the pot (outer layer and insulating layer) are made in a single cycle.

06 Moulds

Each pot model, texture, and size has its own mould.

07 Day & night

Our Capi robots work 24/7.

08 Mould to belt

As soon as the robot is finished, the pot will automatically be taken to the conveyor belt.

Cradle **2** cradle

09 Conveyor belt

The conveyor belt takes the pot to the finishing robot.

10 QR code

Our first finishing robot takes the planter off the belt and makes sure the QR code on the bottom is visible to scan. After scanning the pot will be placed in front of the second finishing robot.

11 Finishing robot

The sharp edges will be removed by our second finishing robot in order to finish the pot.

No waste! 12

The edges coming of the pot will be thrown into our own shredder. This means there is no waste during our whole production process.

13 Back to the roots

The material coming from our shredder goes back to our supplier. There they will be used for new materials.

Our planters are CO2 neutral, made with recycled materials and are 100% recyclable.

Capi Headquarters in The Netherlands.

At the end of 2017, Capi moved to a brand new building in Tilburg. The company is now twice as large and occupies an area of over 38.000 m². The production capacity of the factory, which runs 24/7, has increased with a lot of new robots since the move.

Located in nature.

Capi's head office is located on an industrial area and close to major roads. You wouldn't say so, because the building is surrounded by a lot of greenery and water.

A large in-house warehouse.

Our warehouse has space for more than 20.000 pallet locations, we manage our own stock, we use LED lights on motion sensors and we use electric forklifts.

New robot colleagues.

Did you know we welcomed a lot of new robots last year?

Capi Christmas Forest.

Last year our employees could adopt a Christmas tree. We give the trees a new live in our own 'Capi forest'. Every year the trees will be handed out again. This way less Christmas trees will be thrown out.

Scan this QR Code for our 360 view.

2.000M² Capi Experience centre.

Come visit our showroom for the full Capi Experience. Different styles and textures to inspire you. A place to see and feel our planter, all models, sizes and colours combined in a green oasis. Will we see you there?

Grow a greener parking lot.

In april 2022 we removed the tiles in our parking lot to make place for a beautiful patch of grass. Not only does this make the parking lot greener, it also creates room for biodiversity and ensures a better water drainage.

Capi for vitality.

At Capi vitality is very important. We believe in a good work environment for our employees. That is why we provide sport facilities which they can use for free. Besides that we have a weekly running group, fruit and soup every week.

Did you know.. Capi is the main sponsor of the Warandeloop in Tilburg? Will you join us?

12.000M² solar panels.

We have 4.556 solar panels on our roof providing electricity for our headquarters. The energy generated by this amount of solar panels equals electricity for around 500 households.

Capi contributes to a sustainable world.

Throughout the years Capi made some big changes, with reshoring being the largest one. In 2014 the sustainable Made in Holland collection was introduced. Almost 10 years later you can find our Made in Holland collection worldwide.

Grow a **greener life.**

25 YEARS OF CAPI.

Behind the planters, there is a story that begins in 1997. 25 years ago, Toine van de Ven started a one-man business in Udenhout, the Netherlands.

Over the years, the product range changed from heavy concrete sculptures and ornaments to heavy Terrazzo planters. The planters were then replaced by lightweight Terrazzo-look planters to make them more user-friendly.

In 2014, this collection was enriched by the sustainable Made in Holland collection, along with the biggest

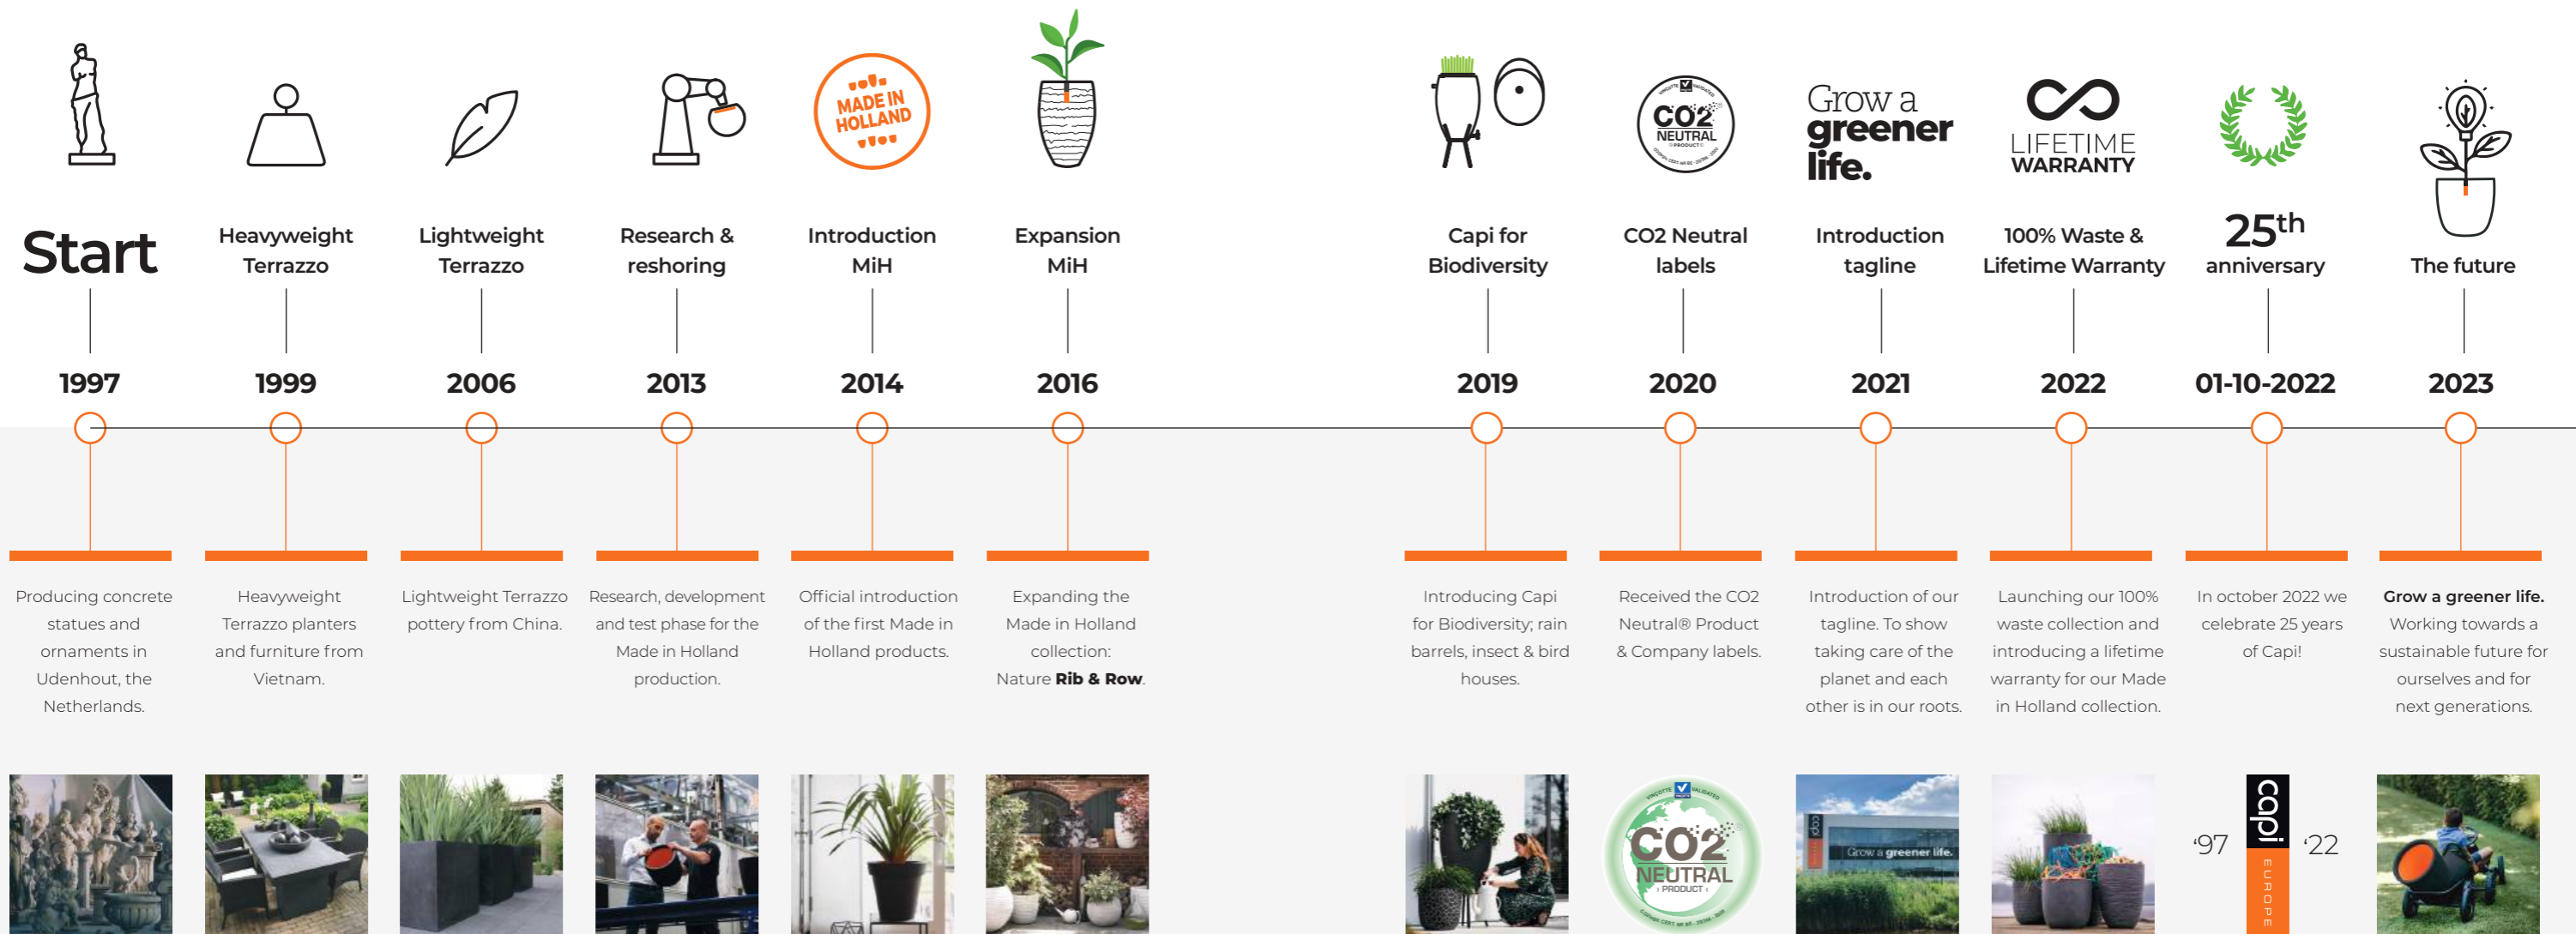

change in Capi's history: the introduction of reshoring. Toine would have never imagined that delivering heavy sculptures would become the preliminary stage for the Made in Holland products available today. Throughout almost 25 years, Toine has made several big changes, with reshoring being the largest one.

2020 was the year Capi Europe took a next step in the process of sustainability. We received the CO2 Neutral® Product and Company label (by Vinçotte), and we are very proud of it!

Every pot from our Made in Holland collection is provided with this quality mark. We are able to do more than just recycling, because this is just a small part of being CO2-neutral.

In 2021 we were able to add a collection made from 100% recycled materials. This collection is made from 100% waste and includes; fishing nets, used corks and recycled Capi planters. It is not without reason our mission is: **'Grow a greener life.'**

And this is just the beginning!

What is new in 2023?

New collections, new products, new colours, a lot of new items this year! We will expand our best textures, introduce new products and you will also find a lot of new colours in this years collection. Look around and pick your favourites.

Rain barrel 400L

This year our rain barrels go even bigger. This new rain barrel can hold up to 400L of water, but is still small and elegant. This makes it a real eye catcher in your garden. That is what we call functional design. (page 56)

New Xala watering cans

Our Xala design products will be expanded with 5 new items. This year we added a lot of small watering cans. Easy for indoor use and vertical gardening, for example. Functional and playful products in a trendy design! (page 60)

New colours Groove

Looking for some colour? Soft, bright, striking, or maybe more calm and elegant? We've got it all! Have a look at our coloured Groove pots. (page 72)

Indoor & outdoor
COLLECTION.

Made in Holland.

The biggest part of the Capi collection is produced completely CO2 neutral in our factory in Tilburg.

Because of our own production process, we are able to manufacture lightweight flower pots, which are 100% recyclable and come with a lifetime warranty.

The orange interior is intended to represent their place of origin and has become a recognisable feature of our brand.

The orange layer also provides the planters with insulation, offering your plants extra protection against both heat and cold. This extra layer provides extra firmness to the planter, which makes it fracture-resistant.

Outdoor
 25 mm
 For outdoor use, please drill a 25mm hole to ensure water drainage.

Indoor
 100% watertight
 The planters are perfect for indoor use, because they are 100% watertight.

Made in Holland Nature collection

Nature as a source of inspiration. With its green leaves and shades, many textures and energy. Our new Nature Groove NL, Nature Rib NL, Nature Row NL and the Nature Clay NL collections are based on these elements. Each texture forms a unique, coherent flow within our collection.

NEW

Nature Groove NL

Our newest 'Groove' texture takes inspiration from the vertical grooves in rocks and mountains that arise from natural changes occurring over the years. A process in nature that made us develop the solid lines of this texture.

Available in black, ivory and anthracite.

Nature Rib NL

The 'Rib' texture gives the planter a natural look. This texture is inspired by wickerwork with its elegant lines. Besides the natural look, the small, dancing lines provide a playful touch to these Capi pots.

Available in black, ivory, anthracite and dark brown.

Nature Row NL

The 'Row' texture is based on sand drifts on the beach. The broad lines on these pots represent rhythmic waves, which produce a calming effect. The relief in the pattern gives the pot a character all of its own.

Available in black, ivory and anthracite.

Nature Clay NL

The 'Clay' texture is inspired by cracked clay soil. It shows the process of nature where solid clay dries out and cracks. One of nature's many forms. The Capi Nature Clay NL is a beautiful eye-catcher in your home or garden.

Available in anthracite and ivory.

Made in Holland Urban collection

Urban life and nature. The perfect combination. Due to the sleek design and a sturdy look & feel, these flower pots are exactly what you are looking for. Take a break from the busy daily life and enjoy the urban design and nature in your house or garden.

The Urban collection is divided into the Smooth NL and the Tube NL.

Urban Smooth NL

The Smooth design is the perfect example of Urban. Old school and modern at the same time. A real classic in our collection. This Smooth texture has the appearance of rough natural stone. The planter features a modern and simple design that fits any interior or exterior.

Available in black.

Urban Tube NL

The lightweight Tube texture features a wonderful vertical structure. This texture is inspired by the new generation of urban. Subtle and modern, but with a statement. The vertical lines give the Tube planters a bold and at the same time a clean look.

Available in black.

Indoor & outdoor: The planters are 100% watertight and therefore perfect for indoor use. For outdoor use, you only have to drill a drainage hole of 25mm.

Urban Smooth NL

Our Smooth collection is the design our Made in Holland collection began with. Their recognisable orange interior is a nod to their origin, but is also an insulating layer that protects the plants they hold from heat in summer and cold in winter. Due to this extra layer the pots are extra sturdy as well, which makes them fracture-resistant.

100% Waste

These design planters out of the Waste NL collection are produced CO2 neutral in the Netherlands and made from 100% waste; old fishing nets, used corks and recycled Capi planters.

This collection takes action and responsibility by taking on one of the biggest waste problems today; fishing nets. These fishing nets are combined with old corks and recycled Capi planters to turn them into high quality products with a functional design.

This collection is suitable for indoor and outdoor use and has a lifetime warranty.

Let us take care of our oceans, ourselves and our next generations. **Will you join us?**

Our 100% Waste collection consists of the following materials:

Used corks

Old fishing nets

Recycled Capi pots

This collection is made from 100% recycled materials.

Made from 100% Waste

Just like the rest of our Made in Holland collections these pots are made CO2 neutrally in our factory in Holland. This collection is made from 100% recycled materials; old fishing nets, used cork and old Capi planters. Available in a dark grey colour and a bright beige colour.

For this collection we skipped our iconic orange interior of the planters to keep the recycled look on the inside as well. This makes the story even stronger, because the planters look 100% recycled all over.

You can recognise the Waste collection by its specially designed label.

Arc Granite Collection

The Arc Granite collection is inspired by contemporary architecture. This collection is a combination of nature and extreme luxury. A playful collection which comes in XS up to XL sizes (up to 177cm!) that can be used indoor & outdoor. Perfect for big venues or as a real eyecatcher in your home and/or garden.

The planters are 100% watertight and therefore suitable for indoor use. Would you like to use the planters outdoors? You only have to drill some drainage holes of 25mm to make sure the water can find its way out of the planter. Because of the smooth material the planters are easy to clean, which makes them usable for outdoor in all weather conditions. You can even use these planters as a small pond.

Available in two colours:

AWBP001

340 gr / 12 oz

You can combine this perfectly with our Peanut butter House.

Available in:

A Anthracite

B Brown

5 YEAR WARRANTY

The bird houses attracts different bird species, for example:

Bird house 1		Bird house 2
Blue Tit *	Nuthatch *	Common redstart
Pied Flycatcher	House Sparrow *	Pied flycatcher
Crested Tit	Tree Sparrow	Starling
Great Tit		Tree sparrow *

 * This bird eats the oak processionary caterpillar.

Based on European bird species.

Scan this QR Code for more info about our biodiversity collection.

Biodiversity Oval

The Oval collection has a natural shape and is available in 3 beautiful colours: Anthracite, Brown and White. This way they will fit in every garden. With this collection you will be able to make a contribution to nature. **This collection is made from 100% recycled materials.**

Bird House 1 Oval

24 x 19 x 23

All our rain barrels are provided with a **luxurious metal tap** including garden hose connection!

Our rain barrels come with a **planter** on top.

Scan this QR Code to go directly to the **manuals** of our rain barrels.

Rain barrels

The climate is changing and the weather is becoming more extreme. There are more days with heavy and prolonged rainfall. And at the same time, there are more periods of sustained heat and drought. This has many adverse consequences. To help maintain a water friendly garden, Capi has developed several design rain barrels.

Thanks to the Capi Rain barrels, you will not only add a beautiful and practical product to your garden, but you will also contribute to biodiversity.

Together we take care of nature.

Outdoor
COLLECTION.

All outdoor planters contain a **drainage hole**, which allows the soil of the plant to breathe. The drainage hole also makes the planter **frost resistant**.

Lux Terrazzo

Scandinavian white or a luxury Terrazzo-look. This collection is inspired by modern luxury and the traditional Terrazzo planters, but then lightweight. Elegant and minimalistic planters that match with every style.

All Lux outdoor planters are available in **sets**.

Also available in **white**.

Groove Black & Gold

The Groove black & gold series give this texture a luxury and festive touch. Go for gold so these planters will shine in your home. Take the black pots for an elegant highlight. Or mix and match the two colours for a festive look. The Groove collection is, as the name says, inspired by grooves. From the vertical grooves in rocks and mountains that arise from natural changes occurring over the years.

Shelf plans in your store.

For our customers we can provide customised shelf, floor, and store plans. Thanks to our experience and product knowledge we can help you with the best product presentations in your store.

Please contact us for the options in your store.

Indoor & Outdoor shelf plans

For our indoor & outdoor collection we advise shelf plans, floor plans, or a combination of these two. We combine this with our Point of Sales materials and customised signing. This way you can provide the right information to your customers together with inspiration through lifestyle images. Indoor & Outdoor is also easy to combine with our Rain barrels and Biodiversity collection for even more garden inspiration.

Indoor shelf plans

Capi Europe provides shelf plans to make sure our products are presented in the best way in your store. We create these plans per shelf or we can create a full indoor wall you can use. To make the best experience we add customized signing above the shelves to inspire the consumer through lifestyle images.

Capi corner

To help you setting up the perfect Capi corner in your garden centre we can create a store plan together. We will combine shelf plans and floor presentations with pot-plant corners to create a full Capi Experience. Together with our lifestyle images and POS material the consumer will see the perfect balance between information and inspiration. The combination of our indoor & outdoor collection, our rain barrels and biodiversity products together with plant tables ensure a green oasis in your store.

Grow a **greener life.**

Displays & mix boxes.

To assist our customers to present the Capi accessoires, we developed displays for a practical presentation.

Please contact us for the options in your store.

Accessories display

Display for Pot pads and/or Hydrocan.

Display for insert pots

You can find the insert pots on page 62.

Indoor displays

For our bestselling 132 models we created different pallet displays which you can easily place in store.

Have a look in our scanbook at page 114 for all versions.

Terrazzo Bowl - TER031

TER031 37 x 9 4L

This black bowl is made of original terrazzo and is therefore sturdy and weather resistant.

This bowl is only available per pallet (135 pieces). See page 105.

Indoor mix boxes

Mostly for webshops we also provide some of our bestselling products in sets.

Have a look in our scanbook at page 114 for all combinations.

Warranty & service.

Every single Capi product comes with a warranty. Our Made in Holland collection comes with a **lifetime warranty** on manufacturing defects when the products are being used properly. We are proud to offer a lifetime warranty on these products to show you that we believe in the quality and long lifespan of our products. We live in a consumer society where we of course want to sell as many pots as we can. But we don't want people to buy a pot and just use it for a few years to throw it away afterwards to buy a new one. We would like to make sustainable design pots that lasts a lifetime!

The rest of our collection comes with a **5 or 10 year warranty** on manufacturing defects. These warranty rules only apply when the products are being used properly.

If anything happens to a Capi product when it is in use, or when a customer comes back with a complaint about a product, please do not hesitate to contact our service department. We are happy to help you. Please visit capi-europe.com/en/guarantee/, fill out the form and we will make sure you will be assisted as soon as possible.

It will be very helpful if you would describe and attach the following:

- Description of the complaint.
- Type of product and size.
- Photos of the product and their defect.
- Purchase receipt.

Scan this QR Code to go directly to **guarantee** page on our website..

Our warranty rules apply when our products are being used properly. There are some thing to take in mind when using a planter;

· Planters need a drainage hole when being used outdoors. This allows the roots of the plants to breathe and it makes sure the water can drain off. This drainage hole also makes the planter frost-resistant. In addition, it is important that the pot is kept off the ground in frosty conditions. If the pot has a flat bottom, it can be placed on pot feet or a trolley. Have a look at page 63 for our pot pads and trolleys.

· Make sure the drainage hole is at least 25mm, otherwise it may be clogged by the hydro grains in the pot. If the pot doesn't have enough drainage, the plant will be standing in too much water for too long (and the pot won't be frost-resistant). Poor drainage can also cause calcification on the outside of the pot. This is easy to clean, but even easier to prevent with a good drainage.

· When the pot is filled, it is less easy to move it because of its weight. Therefore, find a suitable spot in advance. If you do want to move the pot (e.g. because plants have to go inside during the

winter), preferably use a trolley or lift the pot at the bottom with two people. Do not lift the pot by the edges, but at the bottom. The edges are no longer fracture-resistant when the pot is fully filled, because of the weight.

· Not all plants are suitable for pots. Our pots are only fracture-resistant if the potted plants and their roots remain in proportion. Plants with fast-growing roots, create increasing pressure and are not suitable for placing in flower pots. These include tree species, fast-growing plants and, for example, bamboo. These plants are mainly suitable for placing in the ground. If you want to put them in a nice pot, make sure you regularly repot them to a larger pot. If in doubt, always contact our service department or ask for advice in the garden center.

· Make sure the plants are in proportion with the planter you place them in. If the plant is too big or too high the plants probably do not have enough space to grow, and the pot probably can't hold the

plant, in gusts of wind for example, because the pot is not heavy enough to stay upright.

· A flowerpot can always get dirty, especially if it is outside. The flower pots can easily be cleaned with a soft brush or cloth, possibly with some warm water and a little detergent. For shiny flower pots, preferably use a soft cloth to avoid scratches. Do not use high-pressure cleaners, caustic/abrasive products or products with chlorine/ other bleaching agents. Have a look at page 63 for our Capi Care products.

Feel free to contact our service department if you have any questions.

Happy to help!

Filling tip.

The orange insulating layer protects the roots of the plant from heat in the summer and frost in the winter. Also, this second layer makes this planter extra firm and fracture-resistant.

Outdoor
25 mm
For outdoor use, please drill a 25mm hole to ensure water drainage.

Indoor
100% watertight
The planters are perfect for indoor use, because they are 100% watertight.

Grow a **greener life.**

Scanbook.

As a business customer, it can be helpful to do a quick search for articles. For this reason we are again offering a scanbook.

The scanbook contains all articles that can be ordered. This includes both the sets, and the articles that are available individually. In addition to the article details and barcodes, you can find the order unit and the dimensions of the products. There is also a reference to the page in this catalogue where you can find the specific article and collection. We hope this will make ordering a lot easier and faster.

Grow a greener life.
